

## MIRIAM WOOLLY

### COVER LETTER

Dear Hiring Manager,

As an experienced full stack web developer with a Bachelor of Science in Computer Science, I am confident that my technical expertise and problem-solving skills make me a strong candidate for this role.

In my previous role as a Web Developer II at Choctaw Nation of Oklahoma, I collaborated with business analysts, quality assurance teams, scrum master, developers, and managers to create custom applications that enhanced user experiences and improved data collection over time. My responsibilities included analyzing needs, designing, implementing, documenting, repairing, and testing applications within the .NET Framework. I am skilled in agile development, ensuring applications align with user requirements while staying updated on emerging technologies to mitigate technical debt. Additionally, I assisted users with system installation, training, and troubleshooting, providing technical advice and support to end-users.

Throughout my career, I have gained expertise in programming languages and technologies, including Vue, HTML, C#, jQuery, CSS, JavaScript, ASP.NET AJAX, Bootstrap, SASS, Razor, REST APIs, and Microsoft Azure cloud services. Additionally, I have experience working across multiple operating systems, including Linux and Windows environments.

One of my recent projects was updating the Choctaw Nation Voter Registration system using Azure services like Function App, Logic App, and Service Bus. We removed legacy code and migrated the system to Azure to handle highly sensitive data sent to a third-party for ballot processing. What used to take days now takes hours, major win for the team.

Another project I've worked on involved updating a preferred supplier front-end using Vue.js, working with the .NET Framework, and updating and creating new tables and in the SQL database, along with unit testing.

I am confident that my combination of technical proficiency, analytical skills, and bilingual communication abilities in English and Spanish would make me a valuable addition to your team. I look forward to the opportunity to discuss my qualifications further.

Sincerely,

Miriam Woolly

# MIRIAM WOOLLY

WEB DEVELOPER

## Profile

I am dedicated to leveraging my expertise in technology and programming to help drive business success. With experience in various technical skills and practical applications, I am equipped with the knowledge and experience necessary to excel in a challenging and dynamic work environment.

## EXPERIENCE

### WEB DEVELOPER II

Choctaw Nation of Oklahoma

01/17/2017 – 7/15/2024

Durant, OK

- Collaborated with cross-functional teams, including business analysts, quality assurance, scrum masters, developers, and managers, to create customized applications that met user needs and optimized data collection and analysis.
- Designed and deployed cloud-based solutions using Microsoft Azure, including APIM, Logic Apps, Cosmos DB, and Function Apps, ensuring scalability, performance, and security.
- Analyzed user needs, designed, implemented, documented, repaired, and tested existing and new applications in a .Net Framework, meeting agile software development requirements. Stayed updated on the latest technologies to prevent technical debt, and provided technical support to end-users during system installation, training, and troubleshooting.

### Server

Abendigo's Grill & Patio

03/10/2017 – 8/3/2014

Broken Bow, OK

- Ensured guest satisfaction by providing excellent table service in a fast-paced restaurant and bar setting.
- Managed a high volume of orders with accuracy and efficiency.
- Maintained a clean and organized work area to promote a positive guest experience.
